

Dunwich Sewerage Extension Project

July to December 2014

Redland City Council will be undertaking sewerage extension works in Dunwich until late December 2014. The work will be undertaken in four stages.

Affected residents will be contacted directly about access requirements for their property.

While every effort is made to minimise disruption, during works there may be some noise, as well as restrictions to parking and property access. For more information, visit Council's website www.redland.qld.gov.au or call 3829 8189.
